A Life-long Lasting
Experience
in Skopje
The Breathtaking
Capital of North
Macodenia

North Macedonia is a NATO and EU (candidate status) country in Europe, known for its rich history, diverse landscapes, and cultural heritage. It's a modern country with Persian, Greek, Roman and Ottoman cultural influences. Living in capital Skopje are cheaper than in other European capital. The cost of living, including housing, food, and public transport, is relatively low. North Macedonia was the first country in the world to offer V wireless internet and first in Balkans countries to adopt a national action plan for health security (NAPHS).

Macedonia is a **safe country to study**

Foreigners in Macedonia feel welcomed, as if in their own country. Macedonia is known for its security and safety, both for its citizens, and for the foreign visitors, too. The crime rate is very low. Therefore, Macedonia is considered to be one of the safest countries in the region. The local population is widely known for its hospitality and friendliness towards the foreign visitors. Thus, the foreign tourists who flock to Macedonia all year round, as well as the foreign students living in Macedonia, move freely and carelessly in the streets and visit the numerous tourist sites, attractions and

cultural events with no danger whatsoever. The same applies to the foreign students studying at the European University.

Skopje has a very active party culture. "National Geographic" describes Macedonian hospitality with one of the most frequently used phrases in everyday life: "Let's have a coffee", which, in Macedonian, can actually be not only coffee, but beer, dinner or, simply, a socialising code. Macedonians love socialising. According to "National Geographic", if one meets someone new, they will get a friend for life.

Rome of Balkans:

Skopje, home of Mother Teresa & Alexander the Great

Skopje, the capital of North Macedonia, sparkles with a Parisian romance at night and fascinates you, it turns into Rome with its sculptures and structures resembling an open-air museum during the day. Archaeological evidence shows that civilisations flourished in North Macedonia as early as 7000 years BC.

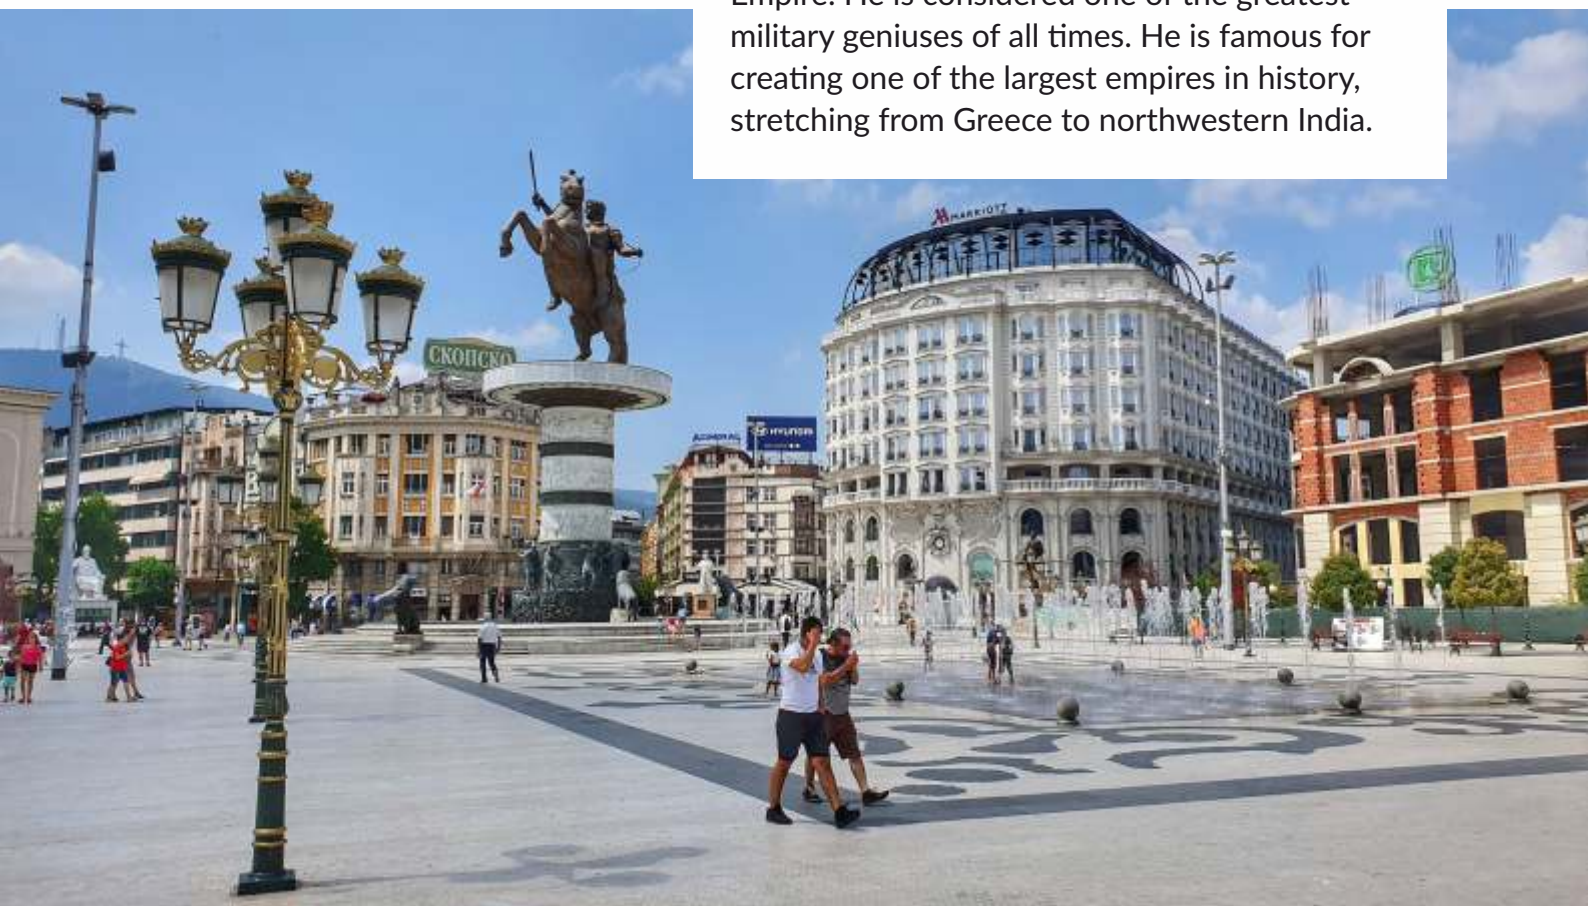

Mother Teresa-A Saint from Skopje

Mother Teresa, born Agnes Gonxha Bojaxhiu, was born in Skopje in 1910. She is best known for founding the Missionaries of Charity, an organization that serves the poor, sick, and destitute worldwide. She is also known for her work in Calcutta Kolkata, India, where she lived for many years and founded the Missionaries of Charity. She received the Nobel Peace Prize in 1979 for her work and was canonized as a saint by the Catholic Church in 2016.

Alexander the Great

Alexander of Macedon was an ancient Macedonian king and conqueror of the Persian Empire. He is considered one of the greatest military geniuses of all times. He is famous for creating one of the largest empires in history, stretching from Greece to northwestern India.

North Macedonia is in East Europe and its capital is Skopje. Skopje is not only a beautiful & modern city, it is also one of the safest and affordable capital in Europe.

Medical School**

Why
Choose
UKIM

Ask “Why?”

Break the Borders, Explore the World, Build Your Future!

We don't just educate future doctors at UKIM – we shape compassionate leaders equipped to transform health care. As the largest medical school in North Macedonia, our statewide network offers unparalleled opportunities to explore your passion, serve unique communities and thrive in a collaborative environment.

We believe there are many measures that show the value in medical education at the UKIM. Here are a few:

A world-famous university with global influence

UKIM degrees are recognised in the European Union and worldwide, in countries such as the U.S., Canada, Australia including India.

High-quality education

Macedonian higher education system is well-developed, regularly monitored and evaluated. Medical program in English have been adjusted to U.S. medical education requirements in order to facilitate participation in residency in U.S..

Modernity

North Macedonia is in Europe and member of NATO and EU (candidate status). Skopje is a modern, historic and student-focused city, where education really counts.

Practical classes and clinical placements

Practical classes and clinical placements are an essential element of medical education in UKIM. Students enjoy broad access to hospitals, clinics, laboratories and libraries.

A genuine European experience

For students from outside the Europe who come to study in UKIM, this may well be the beginning of a fascinating adventure of discovering Europe.

Affordable European education

Compared to other European countries, the tuition fees and the costs of living is the lowest.

Career opportunities

UKIM offers career for our medical graduates, with a high-demand for healthcare professionals in Europe with highest paying.

Among The Top Universities in East Europe

Year after year, UKIM continues to show why it's one of the nation's leading public universities and a top research institution.

Excellence in Education

Know
Education
System

Quality Assurance

UKIM is aligned with the European Credit Transfer System (ECTS), ensuring international recognition and research opportunities.

Bologna Process

UKIM was a pioneer in implementing Bologna reforms, starting the process in 2002/03, which aims to create a unified European Higher Education Area.

Quality Evaluation

UKIM undergo evaluation at least once every five years by the European Quality Assurance Register for Higher Education (EQAR).

Quality Education

European Education

UKIM's General Medicine curriculum is adapting constantly to changing circumstances, and challenges of our time. The curriculum serves an even better balance of clinical practice and theoretical education with the aim of training qualified health professionals with strong practical skills and real clinical experience, built upon a strong theoretical foundation.

UKIM was the first university in the Republic of North Macedonia to implement the Bologna reform and implemented the European Credit Transfer and Accumulation System (ECTS) in the academic year 2002/03. The university's study programs are adapted to the Bologna Process and harmonized with the Law on Higher Education. The European standard in higher education makes it easier for students to obtain recognition of their qualifications in other countries.

The university emphasizes a translational approach to education by building a strong foundation of both theoretical and practical knowledge. The most important objective is to prepare graduates to provide the highest quality healthcare to patients. Today, students from around the globe have the opportunity to acquire hands-on education and training from distinguished professors in an environment equipped with state-of-the-art technology.

Macodenia's largest medical training institution

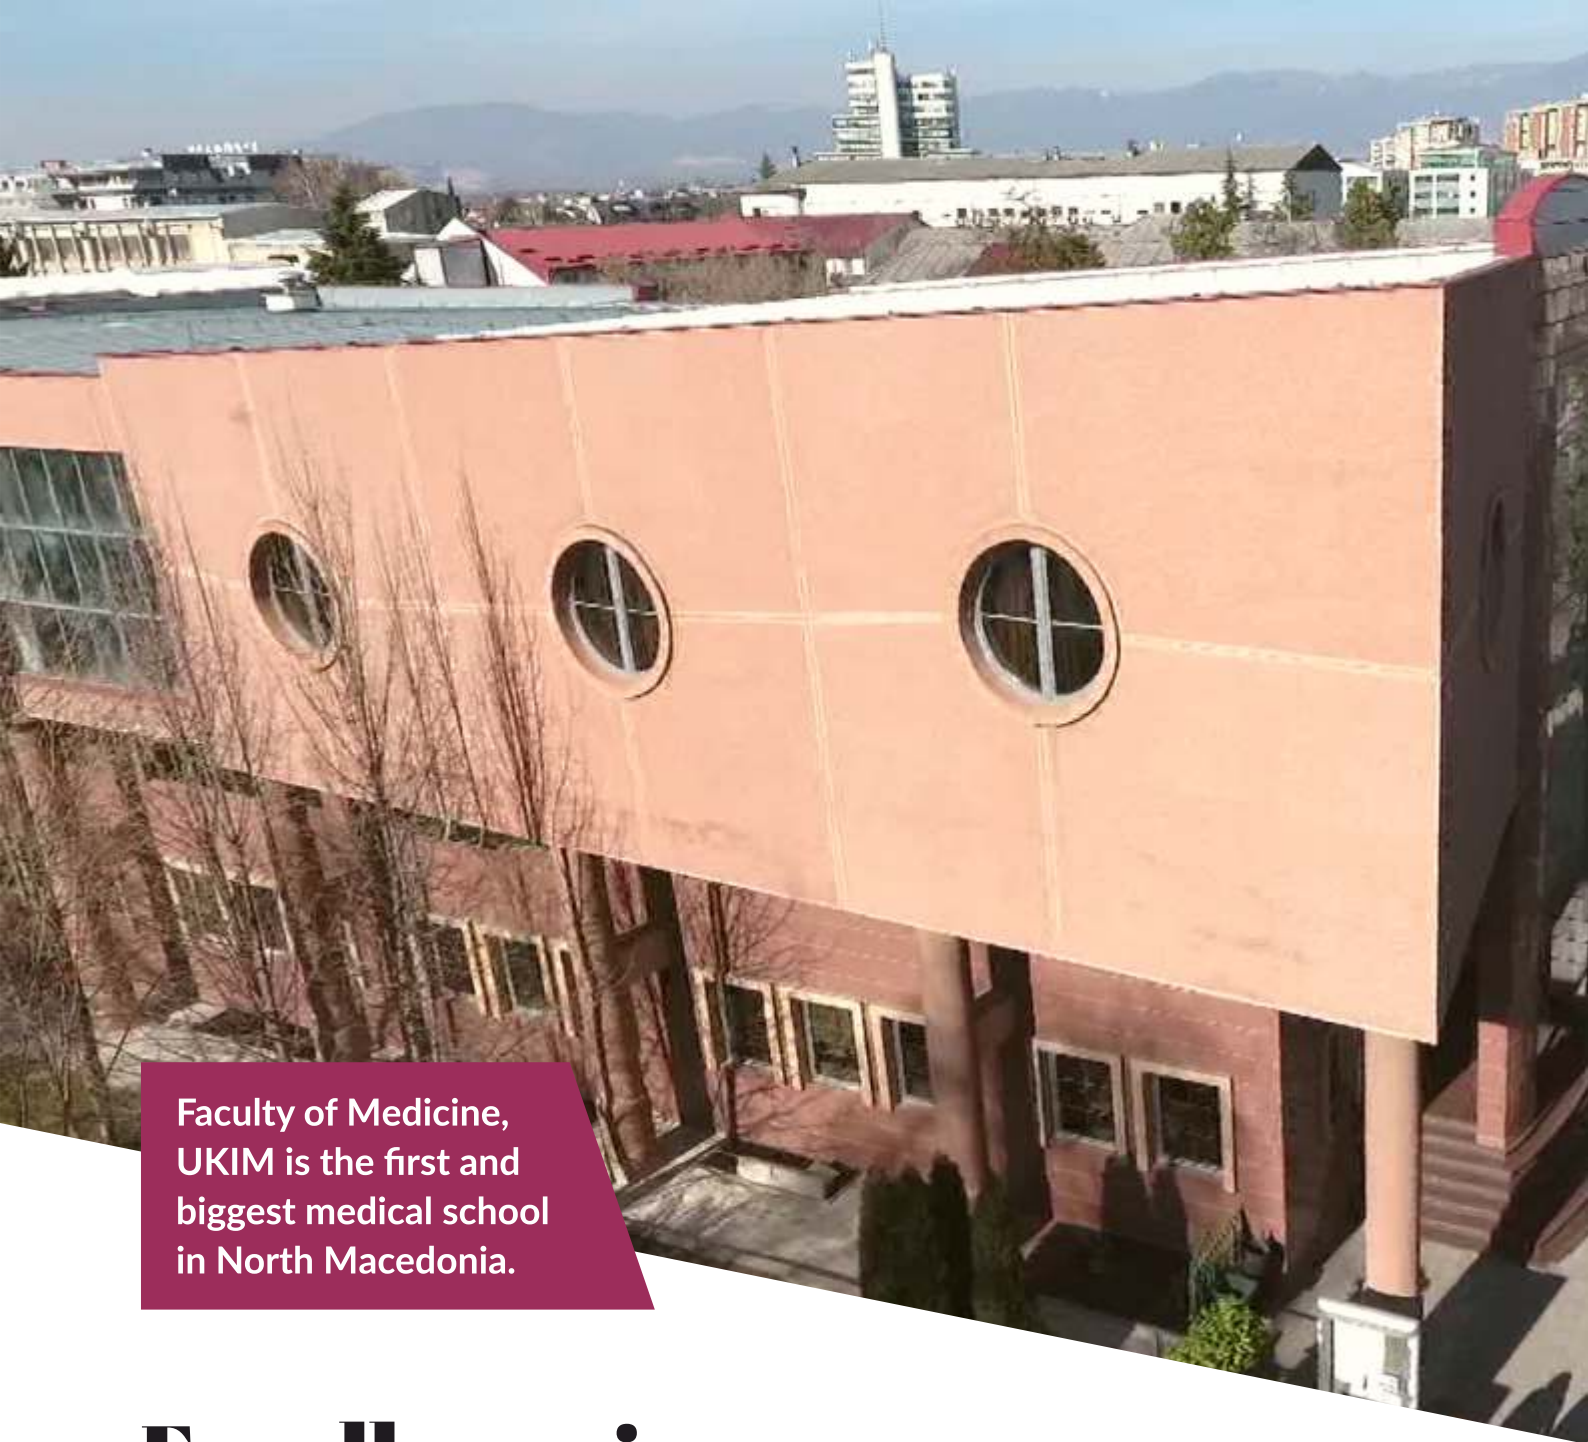

UKIM has the highest number of medical doctors in Macedonia.

Most educators with PHD qualification

Faculty of Medicine, UKIM has the most educators with PhD qualification.

Strong commitment to Practice-Oriented medical education

The 6-year curriculum consists of two years of theory, one pre-clinical year, and 3 year period spent in clinical practice.

Faculty of Medicine,
UKIM is the first and
biggest medical school
in North Macedonia.

Tradition and innovation under one roof.

Faculty of Medicine looks back on over 76 years of tradition at North Macedonia's oldest medical institute and is simultaneously established nationally and internationally as an outstanding center for innovative research. We work closely with major teaching hospitals to provide a truly world class medical education.

The Faculty of Medicine in Skopje, as the largest and oldest institutions of its kind in the country, has an invaluable importance in the educational, scientific and health system of our country.

With its 12 medical institutes and 35 departments, 29 clinics and 3 center, 8 accredited laboratories, the university covers all aspects of medical and health sciences education. A truly international community, the university boasts programs in English, and Macedonian, and the diplomas issued are officially recognized in the European Union and by many other countries around the world.

General Medicine in English language

Undergraduate studies-
integrated 6-year studies with 5876
hours (360 credits)

The integrated studies of General Medicine are arranged in six years, i.e. 12 semesters, the four-year academic studies for speech therapists in 8 semesters, and the three-year vocational studies in 6 semesters studies with 5876 hours (360 credits)

*Seminars are conducted on the mentoring principle with professors and assistants. They are organized as active participation of students in the working process, participation of seminars and/or workshops, public presentations of case reports.

Quality
Theoretical
and Practical
Training, High Scientific
Research Output

“Our fundamental goal is to train physicians who have a high degree of theoretical and practical knowledge, are able to think and make decisions on their own and are motivated to carry on learning for a lifetime.”

**Prof. d-r Svetozar Antovikj,
Dean**

Our medical degree aims to produce confident, knowledgeable and skilled doctors, who are ready to deliver quality patient care from their first day on the job.

Founded in 1946, the Faculty of Medicine is Ss. Cyril and Methodius University in Skopje's oldest and largest faculty. The six-year long medical education program is based on a strong theoretical foundation with a huge emphasis on clinical training supporting the development of practical skills. It will be even more enhanced by the introduction of the European Credit Transfer System (ECTS), which is adapting constantly to changing circumstances and challenges of our time. In addition to its educational activities, the faculty is committed to providing the highest level of progressive healthcare and conducting advanced scientific research within both its classrooms and clinical departments. The faculty encourages students to get involved in research activities during their university years already and later via PhD studies.

A Worldwide Recognized Degree

Details
About
Accreditation

UKiM is Fully Compliant with Foreign Medical Graduate Licentiate Regulations 2021

UKiM is proud to announce that it is completely compliant with the Foreign Medical Graduate Licentiate Examination (FMGL) guidelines set by the National Medical Commission of India.
